

Intercom & entry · in-flat monitor

SPACE SI-PJW7 video intercom monitor

See who's calling. Open with one touch.

Model: **SI-PJW7**

Illustrative image, screen switched off.

Real-life example

It's 11 pm in a rental apartment. A guest rings from the gate and the hallway monitor shows him on screen. The host lets him in with one touch.

In the evening the host switches on Do Not Disturb. If someone rings and nobody answers, the monitor saves the visitor's photo. In the morning the host checks who came.

Key functions

Talk and see

Video calls with the door station, entrance view at any time and door release from the screen.

No interruptions

Do Not Disturb mode and a visitor photo when a call is missed.

On the hallway wall

A flat, 12 mm wall-mounted monitor with a 7" screen and touch keys.

Specifications

Model	SI-PJW7
Screen	7", 800 × 480, with touch keys
Chime	electronic, ≥ 70 dB
Connectivity	RJ-45 (Ethernet)
Power	15 V DC (power supply or system switch); standby 2 W, max 5 W
Operating temperature	−20 ... +70 °C
Mounting	wall-mounted
Dimensions	195 × 125 × 12 mm
Works with	SI-WJZ7 door station, SI-KR10 gatehouse console
Warranty	12 months. We tailor warranty periods to the client's needs and tender requirements.

Works with the SPACE system

The door station, monitors and console talk over the building's local network. Residents' cards and faces are added and removed remotely from the SpaceEngine platform, in the same system as SPACE locks and terminals.

Ordering

- Price on request: we will quote for your building.
- Device selection, network design, installation and commissioning by SPACE or an authorised installer.
- Before go-live we set unique passwords and the site configuration.
