

Vending machines · SPACE

Space Vend Mini

Wall-mounted vending machine with a touchscreen

Illustrative photo; screen design and wrap depend on the configuration.

Unattended sales under your brand

Space Vend Mini is a slim vending machine mounted on the wall. At 26 cm deep it takes up no floor space, so it suits hotel corridors, staff areas, offices, hospitals and gyms.

Customers choose a product on the touchscreen and pay cashless. The machine has 8 spiral channels, with the spiral size matched to your range, and holds up to 96 products.

Options on request: cashless payment module (card, phone), QR code payment, banknote acceptor, coin acceptor, 4G router, age verification, cooling system, logo and body wrap in your brand colours, custom screen interface design, stand with button.

Key functions

Wall-mounted

Slim body with mounting holes. A stand with a button is available on request.

Touchscreen

1920 × 1080 resolution and 350 cd/m² brightness; product choice and payment in one place.

8 channels, up to 96 products

Spirals sized to match your product range.

Managed through Space

Space platform (Space Engine) and integration with building systems via API.

Payments

Cashless as standard; card and phone, QR, banknotes and coins – options on request.

Your brand

Logo, body wrap in your brand colours and a custom screen interface on request.
